For use with residential sectional doors up to 10' high and up to 500 lbs. in weight

- **Durable performance:** The 24 V DC motor features strength & efficiency with an opening speed of 7.0 inches/second.
- **Quiet:** DC motor incorporates soft start and stop design for smooth garage door operation.
- **Warranty:** Legacy 920 is backed by a 15-year limited warranty for the motor & 15 years for the belt drive rail (5 years for chain drive rail)\*.
- **Flexibility:** Choose to have your opener with or without a battery back-up; also choose between a belt or chain rail to suit your preference.

Model 7020H/7020H-B

\*Limited, non-transferable warranty. See operation and maintenance manual for details.

## Standard features

**DC motor smart technology** – The DC motor offers quiet performance and gives the ability to integrate soft start and stop control. This means the door begins and ends its travel smoothly instead of abruptly, helping to lessen noise with the added benefit of less wear and tear on your garage door.

**CodeDodger<sup>®</sup> access security system** – Each time the remote control is activated, a new access code is selected from billions of possible combinations to help prevent piracy of the radio signal that opens your door.

**Auto seek dual frequency** – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

**Safe-T-Beam<sup>®</sup> non-contact reversing system** – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

**C-channel rail** – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

**Light system** – Light bulbs are positioned to each side of the powerhead for light where it's needed most. Lights stay on for 4 minutes once opener is activated for ample time to get into house. Opener uses incandescent (60 watts max per bulb) or most LED and CFL bulbs. (See LED bulb this page for additional option.)

**HomeLink<sup>®</sup> & Car2U<sup>®</sup> compatible** – Works with current and ALL previous versions of HomeLink or Car2U.

**6' power cord** – For hard to reach outlets.

## Convenience options

### Garage door opener LED bulb - NEW!

Common LED & CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs can have their lives shortened by vibration associated with opener operation. Our LED bulb solves these and other problems.

39492R

### OHD Anywhere<sup>™</sup>

Remotely monitor and operate your garage door from almost any smart device. You'll be able to know when someone is operating your door, or close it if your door status shows you left it open. Open the door for a relative, babysitter, delivery, or repair person. Up to 3 doors can be monitored and 20 users added with one system.

39394R

### Digital wireless keypad

Lighted keypad features a flip up cover and lets you control up to three garage door openers.

37225R

### Battery back-up

Provides reliable garage door operation even when there is a power outage. Comes standard with Model 7020H-B.

39524R

## Distributor services

### Installation

Selection of an Overhead Door garage door system includes expert installation and service from our professional network of over 400 distributors.

### Routine maintenance

Let your Overhead Door Distributor ensure that your garage door system operates at peak performance year-in and out. Ask about routine system tune-ups and other professional services offered.
