FOR IMMEDIATE RELEASE

OVERHEAD DOOR COMPLETES 2011 COMMERCIAL INSTALLER PRODUCT TRAINING SERIES

DALLAS (October 4, 2011) Dallas-based Overhead Door Corporation, the nation's leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, has just completed its Commercial Installer Product Training educational series for 2011. Offered to Red Ribbon Distributor Installers, this year's training focused on X-Series Commercial Operators, UL 325-2010, and the FireKing™ Fire Door Series.

"As Overhead Door continues to release industry leading commercial products, it is imperative to train installers on proper product handling, installation and programming," said Daniel Christian, Product Manager of Commercial Doors and Operators.

Building on the collective success of more than 450 Ribbon Distributors in the U.S. and Canada, Overhead Door expanded the Commercial Installer Product Training series this year to five locations nationwide. The registration response was so high that several dates were added to accommodate the increased demand.

"The overwhelmingly positive response to our annual training series is indicative of the professionalism of our distributors and their installers who represent our brand and wear the Red Ribbon," said Jennifer Malcuit, Brand Manager for Overhead Door Corporation.

The training series, led by Overhead Door product experts, included educational sessions, hands-on rolling fire-door installations, operator programming and installation training and open forum discussions. Course attendees and distributorships earned certification upon completion.

Overhead Door products are available through a broad network of more than 450 authorized Overhead Door Ribbon Distributors who provide sales, installation and service to residential, commercial and industrial customers. For more information on Overhead Door products, locating a distributor or becoming a distributor, visit www.overheaddoor.com.

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of doors and

-more-

openers for residential, commercial, industrial and transportation applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door, Wayne-Dalton and Genie brands; Horton Automatics, which includes automatic entrance systems; and TODCO, the largest producer of truck doors for the transportation industry. Overhead Door Corporation created the original overhead garage door in 1921 and the first electric garage door opener in 1926. It now has over 3,500 employees, 24 manufacturing facilities, 79 regional sales centers and over 6,000 distributors and dealers that service national builders, national accounts, architects, general contractors and homeowners, as well as major retailers in the U.S. and Canada. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan. For additional information, visit www.overheaddoor.com.
