FOR IMMEDIATE RELEASE:

NEW STATE-OF-THE-ART OPERATOR ADDED TO RHX™ SERIES

Overhead Offers First-Ever 3 HP Gear Head Motor

DALLAS (Nov. 11, 2010) – Overhead Door Corporation, the nation’s leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, today announced the addition of the RHX™ 3 HP Heavy-Duty Commercial Operator to the RHX™ product series. The 3HP RHX commercial operators are designed for large rolling steel or sectional side/center mount applications, up to 3696 lb. door weight. The operator includes performance features such as:

- **Voltamatic™** – Offers all (or multiple) voltage combinations in single, three-phase and separate 575, three-phase voltage units.
- **DC Disc Progressive Braking** – Allows the brake to function in an “anti-lock” fashion and brings the door to a gentle stop reducing wear and tear on the door system.
- **Limit Lock™** – Features patent-pending, electro-mechanical design that sets limits through the control panel that are maintainable even through a power outage.
- **16-Character LCD Display** – Provides the user with easy to read diagnostics and simplifies initial setup and calibration.
- **Advanced Radio Receiver System with Auto Seek Frequency Range** – Quickly and easily learns up to 250 CodeDodger® transmitters. System will automatically cycle between the 315 and 390 frequencies, add and delete transmitters from the menu, and easily identify which transmitters are operating the door. Owner can identify unknown users in situations of theft or door damage by viewing which transmitters have been operated.
- **True Gear Head System** – Provides reliable operation through a primary drive reduction via worm gear running in oil bath.

“The RHX™ 3 HP product brings identical quality and efficiency to the overall line, but with additional force,” said Daniel Christian, commercial product manager for Overhead Door. “The new line is UL 325-2010 code compliant.”

The RHX™ 3 HP Heavy-Duty Commercial Operator is available through Overhead Door Ribbon® distributors.

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of doors and openers for residential, commercial, industrial and transportation applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door, Wayne-Dalton and Genie brands; Horton Automatics, which includes automatic entrance systems; and TODCO, the largest producer of truck doors for the transportation industry. Overhead Door Corporation created the original overhead garage door in 1921 and the first electric garage door opener in 1926. It now has over 3,500 employees, 24 manufacturing facilities, 79 regional sales centers and over 6,000 distributors and dealers that service national builders, national accounts, architects, general contractors and homeowners, as well as major retailers in the U.S. and Canada. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan. For additional information, visit www.overheaddoor.com.
