FACT SHEET

OVERHEAD DOOR CORPORATION

- COMPANY DESCRIPTION:** Overhead Door Corporation, based in Dallas, is a leading manufacturer of doors and openers for residential, commercial, industrial and transportation applications.
- HISTORY:** Overhead Door Corporation created the original overhead garage door in 1921 and the first electric garage door opener in 1926. Its Access Systems Division now employs more than 3,500 people, has 22 manufacturing facilities, 78 regional sales centers and more than 5,000 distributors and dealers that service national builders, national accounts, architects, general contractors and homeowners, as well as major retailers in the U.S. and Canada.
- PARENT COMPANY:** Sanwa Holdings Corporation
Tokyo-based Sanwa Holdings purchased Overhead Door Corporation in 1996. Founded in 1956 as a shutter manufacturer, Sanwa pioneered the engineering, production, marketing and distribution of steel building materials in Japan. Today, the company is the number one manufacturer of construction products in the Pacific Rim and the combined entity is among the world's leading suppliers of building products with an established and growing presence in 50 countries across five continents.
- PHILOSOPHY:** Overhead Door Corporation and Sanwa Holdings Corporation are committed to offering products and services that contribute to the prosperity of society by providing safety, security and convenience.
- CORPORATE DIVISIONS:** Access Systems Division (ASD) is the largest division of the Overhead Door Corporation and is composed of all products and channels pertaining to the Overhead Door and Wayne-Dalton garage door systems, commercial sectional door systems, rolling steel door systems and high-speed traffic door systems. Dallas-based ASD markets and/or distributes products to homeowners, builders, architects, and commercial/industrial property owners and managers.

The Genie® Company manufactures remote-controlled garage door opening systems for multiple distribution channels. Genie® is one of America's best known and trusted consumer brand names. The Genie® Company is based in Mt. Hope, Ohio.

Horton Automatics™ services the commercial and industrial markets with a variety of automatic entrance systems. Based in Corpus Christi, Texas, Horton builds automatic doors, revolving doors, security entrances and windows. Customers include restaurants, hospitals, nursing homes, airports, hotels, casinos, office buildings, convenience stores, retail food stores and government buildings.

TODCO® is the largest producer of overhead doors for the transportation industry worldwide. Founded in 1957, TODCO® manufactures and markets overhead and swing doors. TODCO® is based in Marion, Ohio, and has manufacturing facilities in Ohio, New York and California.

Creative Door Services is Western Canada's leader in providing door products and services to the residential, commercial and industrial markets.

PRODUCT LINES:

Residential Doors:

Modern Aluminum Collection – Contemporary-style with durable commercial-grade construction, combines glass and aluminum for unparalleled visual appeal and light infiltration.

Signature™ Carriage Collection – Doors that combine the classic, swing-open appearance and detailing of carriage house wood doors with the convenience of standard sectional garage doors. Built to stand the test of time, the collection features the handmade artistry of expert Amish craftsmanship.

Impression Collection™ – Magnificently engineered with an artfully molded wood-grain fiberglass surface concealing durable steel construction.

Courtyard Collection® – Insulated steel doors that provide a “custom wood” appearance and are combined with the durability of steel in 18 classic “carriage house” designs. The collection includes the 160 Series, with an R-value of up to 12.76, and the 370 Series, with an R-value of up to 9.31.

Thermacore® – Premier insulated steel doors featuring a patented steel-polyurethane-steel sandwich construction that provides the highest R-value levels, up to 17.5.

Durafirm™ Collection – With their rugged, thick vinyl skin, Durafirm™ Collection doors are the ideal escape from wood door maintenance and steel door dent and rust worries.

-more-

Traditional Steel Doors – Popular steel doors that provide the durability and performance expected from an Overhead Door system.

Residential Garage Door Openers:

Destiny® 1500 Screw Drive – Our strongest 1 HPc* 140V motor delivers the power to lift almost any residential door. These openers feature a patented, direct drive system that provides the ultimate in power, reliability and fast operation. The DoorDetect™ monitoring system improves overall safety. Motion detection activates bright lighting in the garage.

Odyssey® 1200 Screw Drive – A powerful 3/4 HPc* Power Plus motor delivers 140V and quiet operation. The Odyssey™ 1200 features a patented, direct drive system. The DoorDetect™ monitoring system improves overall safety, while motion detection activates bright lighting in the garage.

Destiny® 1200 Belt or Chain Drive – An advanced garage door opener that offers incredibly quiet, smooth operation. Its 3/4 HPc* Power Plus motor delivers maximum power and the speed needed to operate almost any garage door. The DoorDetect™ monitoring system improves overall safety, while motion detection activates bright lighting in the garage.

Odyssey® 1000 Belt or Chain Drive – This incredibly quiet opener is available with either a belt or chain drive. Its 3/4 HPc* motor delivers all the power and speed needed to operate almost any garage door quickly and smoothly. The DoorDetect™ monitoring system improves overall safety.

Legacy® 800 Belt or Chain Drive – DC motor offers powerful, quiet and durable operation. Operates doors up to 500 lbs. in weight, provides easy installation and programming and features dual-pinion drive gear system for extended durability.

Standard Drive® Belt or Chain Drive – This opener offers a great value and delivers quiet durability. Its smooth performance results from the dual-pinion drive gear system and DC motor for long-lasting and reliable performance.

Commercial Doors:

Sectional Steel Doors – Include Thermacore® Premium Insulated, Insulated and Non-Insulated Steel, Aluminum and Wood Doors. This comprehensive line of sectional steel and insulated steel products features one of the industry's most complete selections of panel profiles, steel gauges, track styles and hardware. The Knock & Lock® impact-resistant dock door features self-resetting breakaway bottom sections for higher productivity and minimal maintenance.

-more-

Rolling Service Doors – Product line includes Rolling Service Doors, Advanced Performance Rolling Service Doors, Rolling Counter Doors and Rolling Sheet Doors. The breadth of the product line ensures that project specifications will be met. This line is ideal for situations where sideroom and headroom are at a premium.

Fire Doors – Product line includes Rolling Service Fire Doors, Counter Doors and Integral Frame and Sill Counter Fire Doors. This line features a wide array of rolling steel doors that meet the most demanding fire safety standards, unusual opening sizes and discerning aesthetic requirements. The FireKing[®] insulated fire door features optimum fire protection plus the sound transmission control of an insulated door.

Security Grilles – Product line includes Upward Coiling, Side-Folding Full Enclosure and Side-Folding Open-Air. This line provides a variety of attractive solutions for retail, commercial and industrial applications. The Rolling Grille Doors are constructed with aluminum, stainless steel or galvanized steel and feature an optional electric motor with emergency egress.

Commercial Operators:

Overhead Door offers a wide variety of Commercial Sectional Operators, Counter Door Operators and Rolling Door Operators designed to suit new construction and retrofit applications, as well as unusual or special requirements. UL 325 compliant.

RHX[®] – A heavy-duty commercial operator designed with a true gear-head system. RHX[®] provides easy and reliable operation for the most stringent applications. Functionality comes from many innovative, state-of-the-art performance features including LimitLock[™], Voltamatic[®], progressive braking and an Advanced Radio Receiver System.

RSX[®] – A standard-duty commercial operator with advanced innovation and superior functionality. The RSX[®] features voltage freedom with Voltamatic[®], easy installation and trouble-shooting, extra safety and security with an Advanced Radio Receiver System and Super Belt[™], which requires no adjustment.

RMX[®] – Designed for quicker installation and hassle-free operation. The RMX[®] offers convenient features and technical innovations that bring medium-duty operators to a higher standard.

RDX[®] – Powered by a DC motor with soft start and stop, this operator is available in medium duty, standard duty and standard duty with hoist. Its compact design requires less side room, while the built-in timer and service reminders provide convenience.

-more-

CDX™ – Provides durable and reliable operation for use in a variety of applications. The CDX™ is a light-duty door operator designed for use on counter and counter fire-door applications.
