OVERHEAD DOOR INTRODUCES COURTYARD COLLECTION® 370 SERIES
New Residential Steel Carriage Door Offers Energy Efficiency and Quiet Performance

DALLAS – Overhead Door Corporation, a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, has announced the introduction of the Courtyard Collection® 370 Series carriage house-style garage door. The 370 Series Courtyard Collection® was developed to bring the curb appeal of the custom carriage house garage door to more homeowners. It includes polyurethane insulation and features the look of wood while offering energy efficiency. It operates almost totally quiet for those homes with living space above the garage and it is surprisingly affordable.

The 370 Series features one-of-a-kind Thermacore® insulation, which offers solid, polyurethane insulation and a low air infiltration rating to keep out elements such as extreme wind and weather. The 370 Series also has a durable two coat, polyester painted steel exterior and interior finish that resists rust and corrosion. It is available in six base door colors and can be customized with decorative hardware and window options. All Courtyard Collection® Series doors are made from steel that uses more than 50 percent recycled content and the insulation does not contain any ozone-depleting chemicals.

“The new 370 Series is the perfect solution for homeowners who want to trade up to an insulated carriage-house style door that is durable and maintenance free,” said Jason Moreno, product manager of residential door systems. “The Courtyard Collection® blends the best of our insulated steel products with the sought-after ‘character’ of custom wood carriage doors, making it appealing to a wide range of homeowners.”

An additional benefit is that by buying select Courtyard Collection® Series doors in 2009, homeowners may qualify for a tax credit. Contact a local Ribbon Distributor for more details.

-more-

Courtyard Collection® 370 Series standard product features include:

- Woodgrain embossed overlays that are easily seen from a distance
- Between section seals that increase thermal efficiency by minimizing light, air, dirt and moisture infiltration
- Thermacore® construction that provides an R-value of 9.31
- Six designs and six base colors
- 1/8” double-strength, non-insulated glass
- Quiet Next Generation track system
- Windload options up to +/- 18.5 PSF available (approximately 100 mph)

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door and Genie® brands; Horton Automatics, which includes automatic pedestrian entrance systems; and TODCO, the largest producer of overhead doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan.
