## **FACT SHEET**

### **OVERHEAD DOOR CORPORATION**

- COMPANY DESCRIPTION:** The Overhead Door Corporation, based in Dallas, is recognized as a leading single-source manufacturer of integrated door and operator systems for residential, commercial and industrial applications.
- HISTORY:** Founded with C.G. Johnson's invention of the original overhead garage door in 1921, followed by the first electric garage door opener in 1926.
- PARENT COMPANY:** Sanwa Holdings Corporation. Established in 1956 as a shutter manufacturer, Sanwa pioneered the engineering, production, marketing and distribution of steel building materials in Japan. Today, the company is the number one manufacturer of construction products domestically, and has leveraged its brand equity to become the recognized industry leader worldwide. Sanwa Holdings Corporation purchased Overhead Door in 1996.
- PHILOSOPHY:** Overhead Door Corporation and Sanwa Holdings Corporation are committed to offering products and services that provide safety, security and convenience to further contribute to the prosperity of society.
- CORPORATE DIVISIONS:** Access Systems Division (ASD) is the largest division of the Overhead Door Corporation, composed of all products and channels pertaining to the Overhead Door and Genie® branded garage doors, garage door openers, accessories, commercial sectional door systems, rolling steel door systems and high-speed traffic doors. Dallas-based, the ASD markets and/or distributes products to homeowners, builders, architects, and commercial/industrial property owners and managers.

**CORPORATE DIVISIONS:** Horton Automatics<sup>™</sup> services the commercial and industrial markets with a variety of automatic entrance systems. Based in Corpus Christi, Texas, Horton builds automatic doors, revolving doors, security entrances and windows. Customers include restaurants, hospitals, nursing homes, airports, hotels, casinos, office buildings, convenience stores, retail food stores and government buildings.

TODCO<sup>®</sup> is the largest producer of overhead doors for the transportation industry worldwide. Founded in 1957, TODCO<sup>®</sup> manufactures and markets overhead and swing doors. TODCO<sup>®</sup> is based in Marion, Ohio, and has manufacturing facilities in Ohio, New York and California.

**PRODUCT LINES:**

Residential Doors:

Modern Aluminum Collection – Contemporary-style door with a variety of window configurations including full vision for maximum light infiltration. Features durable, commercial grade construction.

The Ranch House<sup>®</sup> Collection – Superior, hand-crafted custom wood doors made to customer’s specifications in a selection of premium woods that provide a very upscale look to a home.

Courtyard Collection<sup>®</sup> – Insulated steel doors that provide a “custom wood” appearance combined with the durability of steel in 18 classic “carriage house” designs. Includes the 160 Series with an R-value of 12.76 and the 370 Series with an R-value of 9.31. These two types of doors are available in R-values up to 12.76 (160 Series) and 9.31 (370 Series).

EcoBuilt<sup>™</sup> - Naturally beautiful garage doors feature the distinctive look, feel and strength of hand-crafted wood with an environmentally-friendly construction. The EcoBuilt<sup>™</sup> Verde Collection<sup>™</sup> and Traditional Panel Collection<sup>™</sup> are SCS (Scientific Certification Systems) certified to use a minimum of 88 percent recycled materials. The EcoBuilt<sup>™</sup> product line was named one of the “50 Most Innovative New Exterior Products for 2008” by *Professional Remodeler*.

Traditional Wood Doors – Full wood raised panel doors are available in a range of styles from economical doors made of hardboard panels to Hemlock or master-crafted meranti hardwood.

-more-

**PRODUCT LINES:**

Thermacore<sup>®</sup> – Premier steel insulated doors featuring patented steel-polyurethane-steel sandwich construction providing the highest R-value levels up to 17.5.

Ribbon<sup>®</sup> V12 – Embossed steel carriage house door, a cost effective design alternative to a traditional raised panel steel door. It features a pronounced wainstcot design, enhanced safety features and quiet operation.

Banner Collection<sup>®</sup> – Insulated and non-insulated steel doors designed for smooth, quiet operation with pinch-resistant panels and many other safety enhancements.

Traditional Steel Doors – Popular steel doors that provide the durability expected from an Overhead Door system.

Residential Garage Door Openers:

Standard Drive<sup>®</sup> Belt – Quiet operation, easy installation and durability. Dual-pinion drive gear system for longer life.

Standard Drive<sup>®</sup> Chain – Easy to install with the DualDrive<sup>™</sup> dual-pinion drive gear system and chain T-rail, the Standard Drive<sup>®</sup> Chain delivers smooth and reliable performance.

SilentMax<sup>®</sup> XL – Heavy-duty performance with a reinforced belt drive for quiet, smooth operation.

Legacy<sup>®</sup> XL – Heavy-duty channel rail system available with either a belt or chain drive system combines extra strength with quiet operation and durability.

Legacy<sup>®</sup> – Featuring patented motor for greater lifting force, a full-chain drive and solid Steel T-rail for long-lasting performance.

Phantom<sup>®</sup> – The fiber-reinforced belt-drive system makes for a very quiet opener.

Signature<sup>™</sup> – Superior screw drive opener with advanced direct-drive motor system and fewer moving parts ensures dependability and powerful lifting force.

OverDrive<sup>®</sup> – Revolutionary opener that opens twice as fast, yet closes gently and at standard speed.

**PRODUCT LINES:**

Commercial Doors:

Sectional Steel Doors – Include Thermacore® Premium Insulated, Insulated and Non-Insulated Steel, Aluminum and Wood Doors. This comprehensive line of sectional steel and insulated steel products features one of the industry's most complete selections of panel profiles, steel gauges, track styles and hardware. The Knock & Lock® impact-resistant dock door features self-resetting breakaway bottom sections for higher productivity and minimal maintenance.

Rolling Service Doors – Include Rolling Service Doors, Rolling Counter Doors and Rolling Sheet Doors. The breadth of the product line ensures that project specifications will be met. Ideal for situations where sideroom and headroom are at a premium.

JetRoll® High Performance Door – Includes products for interior and exterior applications including insulated and windloaded fire doors. Ideal when a project requires high-cycle, low-maintenance, fabric traffic doors that save energy, control noise, isolate dust and dirt and reset easily after an impact.

Fire Doors – Include Rolling Service Fire Doors, Counter Doors and Integral Frame and Sill Fire Counter Doors. Feature a wide array of rolling steel doors that meet the most demanding fire safety standards, unusual opening sizes and discerning aesthetic requirements. The new FireKing™ insulated fire door features optimum fire protection and the sound transmission control of an insulated door.

Security Grilles – Include Upward Coiling, Side-Folding Full Enclosure and Side-Folding Open-Air. A variety of attractive solutions for retail, commercial and industrial applications. The Rolling Grille Doors are constructed with aluminum, stainless steel or galvanized steel and feature an optional electric motor with emergency egress.

Commercial Operators:

Include Commercial Sectional Operators, Counter Door Operators and Rolling Door Operators. Broad line of electric operators to suit new construction and retrofit applications, as well as unusual or special requirements.

**PRODUCT LINES:**

RMX<sup>®</sup> – Designed for quick installation and easy operation with socket-lock protection and auto-tensioning belt system. The intelligent menu structure makes daily operations and upgrades simpler.

RSX<sup>™</sup> – An innovative line of standard duty commercial operators for increased productivity. Features voltage freedom with Voltamatic<sup>™</sup>, easy installation and troubleshooting with Einstein Logic<sup>™</sup>, extra safety and security with Advanced Radio Receiver System and no adjustment is needed with Super Belt<sup>™</sup>.

RDX<sup>®</sup> – Powered by a DC motor with soft start and stop, this operator is available in medium, standard duty and standard duty with hoist. Its compact design requires less side room and built-in timer and service reminders provide convenience.

**DISTRIBUTION:**

The Company's products are available through a nationwide network of more than 450 authorized Overhead Door Ribbon<sup>®</sup> distributors who provide sales, installation and service to customers. To locate a dealer: From the United States, call 1-800-929-DOOR or outside of the United States: 1-717-248-0131; fax 1-717-248-3641
