## **LIVING WITH IT: OVERHEAD DOOR'S RESIDENTIAL STYLE**

**DALLAS** – The Overhead Door Corporation was founded in 1921 with the invention of the overhead door, better known as “the garage door.” Since that time, Overhead Door has lead the way through product, service and quality innovation and a variation on its very own *original* door that the company introduced more than 85 years ago.

Today, Overhead Door offers a wide selection of residential garage doors that suit the styles and sensibilities of builders and homeowners alike. From traditional raised panel and insulated steel to custom wood and contemporary, residential door offerings include the Courtyard Collection™, Ribbon® V12, The Ranch House® Collection, Modern Aluminum Collection, Banner Collection®, Thermacore®, Signature Collection and Traditional Steel Doors. Each collection includes options that make choosing the right door for their home and lifestyle easy for consumers. Those interested in creating their very own garage door can visit [www.overheaddoor.com](http://www.overheaddoor.com) and choose “design a door” to access and experiment with Overhead Door’s residential selection.

### **Courtyard Collection™**

**Distinguishing Characteristics:** Combines the value and durability of steel doors with classic “carriage house” designs. Courtyard Collection™ doors are designed to provide homeowners with a broader choice of styles to complement the architecture of their home at a significantly lower cost than custom wood doors.

**Technically Speaking:** Patented Thermacore® construction; polyurethane insulation for excellent thermal efficiency (with R-value of 12.76); heavy-duty commercial track and hardware for long life and reliable performance; EPDM between section thermal seals and EPDM bulb-type bottom weather tight resistance to the elements.

**Just Right For:** Homeowners seeking major curb appeal and the options offered with 18 classic designs to provide their home with unsurpassed beauty, durable construction and thermal efficiency. Doors are finished in white with a distinctive wood-grain texture, and can be painted with latex paint colors.

### **Ribbon® V12**

**Distinguishing Characteristics:** An extension of the popular Courtyard Collection, the Ribbon® V12 is an embossed steel entry-level carriage house door and a cost effective design alternative to traditional raised panel steel garage doors. The Ribbon® V12 features a pronounced wainscot embossment that can easily be seen from the street, enhanced safety elements and quiet operation.

**Technically Speaking:** The Ribbon® V12-321 series is a non-insulated steel door and The Ribbon® V12-323 series features a full-depth insulation (with R-value of 6.17) with vinyl backing. The Ribbon® V12's quiet performance is attributed to the self-lubricating Triathlon™ hinge system with no metal-on-metal moving parts and spring-tensioned polymer rollers. The door also features pinch-resistant panels and tamper-resistant bottom fixtures.

**Just Right For:** Those seeking a cost effective carriage house door with the durability and low maintenance of steel and those seeking a design alternative to a raised panel steel door to easily complement their home's architecture. The Ribbon® V12 is available in five colors and can be painted in any color for further customization. Optional decorative hardware, windows and window trim add even more of an "old world" feel.

### **The Ranch House® Collection**

**Distinguishing Characteristics:** Overhead Door Corporation's line of classically styled custom wood garage doors. Built with expert craftsmanship and high-quality natural woods in 18 designs, The Ranch House® Collection doors are available in custom or semi-custom wood construction.

**Technically Speaking:** A selection of 18 styles built with superior woods; quality custom and semi-custom construction for reliable performance; optional decorative hardware to compliment the home's architectural style; expert service and design consultation from the trusted brand for garage door products.

**Just Right For:** Those with respect for the classics seeking architectural appeal and the look that says "attention to detail." Also good for those who want total control, as custom wood options let the homeowners take the lead.

### **Modern Aluminum Collection**

**Distinguishing Characteristics:** Customized aluminum doors combine durable construction with contemporary styling while adding a unique architectural feature to the home.

**Technically Speaking:** The Modern Aluminum Collection features durable commercial grade construction garage doors. Several window configurations are available, including full vision for maximum light infiltration. Insulated or non-insulated glass, and tempered, obscure glass for added styling and privacy, is available. The garage door is available with a clear anodized finish, can be powder-coated in 196 colors, or color-matched to homeowners' specifications.

**Just Right For:** Homeowners looking for the perfect complement to a contemporary or retro-style home. An added bonus is that the Modern Aluminum Collection doors may also be used in some instances to create “moveable walls” for indoor/outdoor living spaces.

### **Banner Collection**<sup>®</sup>

**Distinguishing characteristics:** Exceptionally quiet operation, enhanced safety features, refined embossment, improved dent resistance and a variety of window options. Coupled with Overhead Door’s OverDrive<sup>®</sup> garage door opener, it is a faster, quieter garage door system.

**Technically speaking:** The Banner Collection’s quiet performance is due to the self-lubricating Triathlon<sup>™</sup> hinge system with no metal-on-metal moving parts and spring-tensioned polymer rollers. The enhanced safety features include pinch-resistant panels and tamper-resistant bottom fixtures. The Banner Collection<sup>®</sup> is extremely durable utilizing a higher tensile strength steel on panels, 15 gauge steel track and bulb-type weather seal.

The Banner Collection<sup>®</sup> includes The 311 series, which is the entry-level steel door with non-insulated sections; The 312 series features a moderate layer of polystyrene (with R-value of 4.37) that provides added protection against temperature variations; The 313 series door features a full depth of polystyrene insulation (with R-value of 6.17) and is backed with vinyl, providing enhanced protection against the elements; and The 351 series features a full depth of insulation with steel backing (with R-value of 9.83), providing the highest level of thermal efficiency.

**Just Right For:** Homeowners who wish to customize doors specifically for their home’s style. Banner Collection<sup>®</sup> doors are available in either classic raised panels or traditional long panels and feature wood detailed embossments. The doors are available in five colors: white, almond, sandstone, desert tan or brown. The Banner Collection<sup>®</sup> doors can also be personalized by choosing from an array of optional window styles including decorative trim with glass upgrades, Bevelite<sup>®</sup> acrylic glass and etched glass.

### **Thermacore**<sup>®</sup>

**Distinguishing Characteristics:** Premiere steel insulated doors featuring Overhead Door’s patented metal-foam-metal sandwich construction providing the highest R-value levels for exceptional thermal efficiency.

**Technically Speaking:** The patented metal-foam-metal sandwich construction features R-values of up to 17.50 (the higher the R value, the greater the insulation properties); CFC-free foamed in place polyurethane insulation; EPDM between section seals that minimize air infiltration and thermal transfer; hot-dipped, galvanized steel sections resist rust and corrosion and a bulb-type bottom weather seal shuts out the elements.

**Just Right For:** Homeowners who experience extreme temperatures and want to stay nestled inside to escape from what’s just too hot or too cold.

### **Signature™ Collection**

**Distinguishing Characteristics:** Superior custom full-wood doors available in a variety of woods from economical hardboard to beautiful Meranti mahogany.

**Technically Speaking:** Precision cut panels and rails and heavy-duty hardware throughout. Insulation available on some series.

**Just Right For:** Homeowners looking to give their home a truly distinguished look.

### **Traditional Steel Doors**

**Distinguishing Characteristics:** Popular steel doors that provide the long-lasting durability expected from an Overhead Door system.

**Technically Speaking:** It's all about steel. The product selection ranges from non-insulated to full depth insulated styles with steel backed interiors; 10 year to lifetime warranty available.

**Just Right For:** This is an excellent basic choice for any home as the steel door provides years of good use and dependability.

### **MORE CHOICES!**

NOTE: Most of the above garage door product lines offer a variety of window, hardware, color and door opener options worth exploring.

Overhead Door also offers wind-resistant versions of some of its most popular doors and the WindStorm™ Collection offers superior reinforcement for homeowners in high wind areas.

More information on upgrade and windload options is available through local Overhead Door Ribbon® distributors.

### **About Overhead Door Corporation**

Overhead Door Corporation, based in Dallas, Texas, is the nation's leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company including the Access Systems Division (ASD), the largest, which features Overhead Door and Genie® branded products; Horton Automatics™, which includes automatic entrance systems; and TODCO®, the largest producer of overhead doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Shutter Corporation of Tokyo, Japan. For additional information, visit [www.overhaddoor.com](http://www.overhaddoor.com).
