**OVERHEAD DOOR INTRODUCES LEGACY® 800 BELT
RESIDENTIAL GARAGE DOOR OPENER**

New opener designed for very quiet and smooth operation, power and durability

DALLAS (October, 2009) – Overhead Door Corporation, a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, today announced the introduction of the Legacy® 800 Belt garage door opener. The Legacy® 800 Belt garage door opener provides very quiet and smooth operation and powerful, reliable performance.

“The Legacy® 800 Belt offers a DC motor and belt drive, setting the standard for smooth and quiet operation,” said David Shelton, Senior Product Manager of Residential Openers for Overhead Door Corporation. “Homeowners can enjoy the convenience of a quiet, powerful opener that requires little or no maintenance.”

The Legacy® 800 Belt garage door opener features a ½ HPc Power Plus* DC motor that operates quietly and at variable speeds for soft start and stop, resulting in less wear and tear on the garage door, and is powerful enough to operate heavy garage doors. Its effortless limit setting and reliable frequency range ensure consistent operation. The Legacy® 800 Belt is compatible with Car2U® and HomeLink® in-car universal remote systems, and has additional remote and accessory options.

*Designates that it exceeds Overhead Door’s lifting force specification for ½ horsepower garage door openers

-more-

The Legacy® 800 Belt garage door opener features premium safety elements such as the Safe-T-Beam® System that stops and reverses the closing door if an object passes through the infrared beam. The system's self-diagnostic functions alert homeowners of improper operations, pinpoint specific problems and help identify solutions. The Legacy® 800 Belt garage door opener also includes a two 60-watt bulb lighting system for brighter lighting in the homeowner's garage. The opener's CodeDodger® Access Security System activates a new access code from 4.3 billion combinations each time the remote control is used to prevent piracy of the radio signal that opens the garage door.

The Legacy® 800 Belt garage door opener will be available through Overhead Door's nationwide network of Ribbon® distributors in October 2009.

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door and Genie® brands; Horton Automatics, which includes automatic pedestrian entrance systems; and TODCO®, the largest producer of overhead doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first electric garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan. For additional information, visit www.overheaddoor.com.
