**OVERHEAD DOOR INTRODUCES
RDX™ COMMERCIAL OPERATOR SERIES**

New Commercial Door Opener Designed for Easy Installation

DALLAS – Overhead Door Corporation, the nation's leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, announces the introduction of the new RDX™ commercial operator series - a line of standard and medium duty commercial DC motor operators. RDX™ operators can be installed by one person and offer secure and reliable operation for commercial sectional doors.

The RDX™ series is available in three models: Medium (M), Standard (S) and Standard with Hoist (S-H). The pre-assembled, self-contained units save considerable installation time, offer a variety of standard safety and convenient features, and require no additional equipment.

“RDX™ is perfect for applications with limited space, quiet operation and quick installation,” said Danial Christian, product manager for Overhead Door. “This operator’s built-in features eliminate the need to install additional accessories, saving considerable time on the installation process.”

RDX™ offers an automatic limit switch, which eliminates the need for installers to have to set open and close limits. This commercial operator also features QIK-FIT™ install, and a low-voltage DC motor for quiet operation. RDX™ Commercial Operator Series will be available to distributors nationwide on February 6, 2008.

-more-

RDX™ Commercial Operator standard product features include:

- Automatic limit setting
- Installation requires no additional equipment, saving considerable installation time
- Lightweight and quiet operation
- Soft start and stop reduces noise and wear and tear and eliminates cable jumping
- Built in timer to close; useful for special applications like unmanned fire stations
- Safety reversing feature, auto reversing upon obstruction without use of optional sensing edges
- Compact design requires significantly less side room vs. typical commercial operators
- Slows down upon third attempt to close after detecting an obstacle
- Service reminders set up at every 2,500 cycles from controller
- Cycle counter
- Automatically locks and unlocks door upon operation with an optional accessory (solenoid lock)

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is the nation's leading manufacturer of upward-acting doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door and Genie® brands; Horton Automatics™, which includes automatic pedestrian entrance systems; and TODCO®, the largest producer of upward-acting doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Shutter Corporation of Tokyo, Japan.
