**OVERHEAD DOOR FEATURES ITS STANDARD DRIVE® CHAIN
GARAGE DOOR OPENER**

New Opener Designed for Residential Doors

DALLAS – Overhead Door Corporation, a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, is proud to sell the Standard Drive®, its newest garage door opener. Standard Drive® is easy to install and is uniquely designed to be durable and quiet. The DualDrive™ chain system was specifically designed to bring a new “quiet” benchmark for consumers and builders who have living space above the garage and want an opener that provides quiet and smooth operation at a great value.

“In addition to Standard Drive’s industry-leading features, such as the SmartSet™ for easy programming and installation, sleek design and quality craftsmanship, the new opener is quick to install and requires little maintenance,” said David Shelton, senior product manager for Overhead Door.

The Standard Drive® garage door opener also features the self-diagnostic Safe-T-Beam System® that stops and reverses the closing door if an object passes through the infrared beam. The system’s self-diagnostic functions alert homeowners of improper operations, pinpoint specific problems and help identify solutions. This opener also features CodeDodger® Access Security System, in which a new access code is activated from 4.3 billion combinations each time the remote control is used, in order to prevent piracy of the radio signal.

About Overhead Door Corporation

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door and Genie® brands; Horton Automatics, which includes automatic pedestrian entrance systems; and TODCO, the largest producer of overhead doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan.
