**OVERHEAD DOOR INTRODUCES STANDARD DRIVE™ BELT  
RESIDENTIAL GARAGE DOOR OPENER**  
*New Opener Designed for Residential Doors*

**DALLAS** – Overhead Door Corporation, the nation’s leading manufacturer of upward-acting doors and openers for residential, commercial and industrial construction applications, announces the introduction of the Standard Drive™ Belt, its newest garage door opener. The Standard Drive™ Belt garage door opener provides the quiet smooth performance expected of a belt opener, at a great value.

“The Standard Drive™ Belt will set the benchmark for consumers and builders who want an opener that provides quiet and smooth operation,” said David Shelton, senior product manager for Overhead Door.

The Standard Drive™ Belt garage door opener also features a Self-Diagnostic Safe-T-Beam® System that stops and reverses the closing door if an object passes through the infrared beam. The system’s self-diagnostic functions alert homeowners of improper operations, pinpoint specific problems and help identify solutions. This opener also features CodeDodger® Access Security System, in which a new access code is activated from 4.3 billion combinations each time the remote control is used to prevent piracy of the radio signal.

The Standard Drive™ Belt is available to distributors nationwide.

**About Overhead Door Corporation**

Overhead Door Corporation, based in Dallas, Texas, is the nation's leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company including the Access Systems Division (ASD), the largest, which features the Overhead Door and Genie® brands; Horton Automatics™, which includes automatic entrance systems; and TODCO®, the largest producer of upward-acting doors for the transportation industry worldwide.

Overhead Door created the original overhead garage door in 1921 and the first garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Shutter Corporation of Tokyo, Japan. For additional information, visit [www.overheaddoor.com](http://www.overheaddoor.com).
