Overhead Door™ Brand Now Offers RapidFlex® Model 991 in Stainless Steel Options, Ideal for Food Processing Facilities

The high-speed interior fabric doors' new package options allow food facilities to secure FDA and USDA approvals and follow good manufacturing practices

January 14, 2021 - Overhead Door™ Brand, a leading manufacturer of residential and commercial door solutions, is expanding RapidFlex® Model 991 with new stainless steel options geared specifically for applications prioritizing cleanliness, such as food processing facilities.

The new package includes stainless steel choices including those for front and wall guides, sloped hood, head plates and operator cover. The enhanced features allow food facilities to obtain FDA and USDA approvals and follow good manufacturing practices (GMPs).

“RapidFlex® 991 is a popular industrial door in facilities requiring solutions that provide separation of controlled environments. The new stainless steel package further enhances its protective and sanitary benefits,” said Christian Morrow, Brand Manager for Overhead Door™ Brand. “This is especially important for spaces such as food and beverage facilities, high traffic zones, storage rooms and manufacturing areas to prevent cross contamination.”

RapidFlex® 991 is a high-speed interior fabric door featuring dual-recessed photo eyes and a patent-pending curtain lock, which allows the doors to withstand pressure and enables them to be repaired quickly in the field. It is corrosion-resistant to water, cleaners, soaps and other chemicals, resists reaction to blood, animal parts and other substances to maintain sanitary conditions and withstands regular washdowns while being easy to clean, keep sanitary and inhibit bacterial growth.

Offering speeds of up to 70 inches per second and certified air tightness to prevent airborne contaminants from entering a controlled environment, RapidFlex® 991 operates via a direct drive motor and gearbox system with a door stop device. With built-in obstruction detection, infrared sensors are mounted in-plane to the door curtain. RapidFlex® 991 comes with a five-year limited warranty.
