Overhead Door™ Brand Introduces the Universal Keypad, Delivering a Convenient Solution to Homeowners

Homeowners will now be able to control multiple garage door openers from some of the most popular brands sold in the U.S. with the brand's first Universal Keypad

July 8, 2020 - Overhead Door™ Brand, one of the leading brands of garage doors and openers for residential, commercial and industrial applications, has introduced its first Universal Keypad, allowing homeowners to control up to three garage door openers with one device and PIN. Compatible with some of the most popular garage door opener brands sold in the U.S., the Universal Keypad is easy to set up and control with simplified keypad programming and efficient backlight coverage.

“Many homeowners have multiple garage doors and don’t always have the same garage door opener brand for each. It can be a hassle managing them all and difficult to remember the various access codes. By expanding its opener accessory product line with the convenience and versatility of the Universal Keypad, Overhead Door™ Brand continues to offer customers leading innovation through quality products that improve everyday life,” said Christian Morrow, Brand Manager for Overhead Door™ Brand.

With the Universal Keypad, homeowners have flexibility to mix-and-match garage door opener and receiver brands. The Overhead Door® Universal Keypad is compatible with garage door opener brands such as Overhead Door™, LiftMaster®, Chamberlain®, Genie®, Wayne Dalton®, Linear® and more of the most popular brands sold in the U.S. Those with an existing wireless keypad from compatible manufacturers who desire a convenient, user-friendly solution can replace theirs with the new device. The Universal Keypad is available in white and is also compatible with colored keypad lids (sold separately). To operate, two AAA batteries are required and are included with every purchase of the product.
