Overhead Door™ Brand Releases Wireless Wall Console Garage Door Accessory

Requiring absolutely no wiring, the new accessory speeds up the installation process for distributors and is compatible with most Overhead Door® CodeDodger® openers

August 19, 2019 - Overhead Door™ Brand, one of the leading brands of garage doors and openers for residential, commercial and industrial applications, has introduced a new garage door opener accessory, the Wireless Wall Console, which reduces installation time and grants placement flexibility. Requiring absolutely no wiring, the accessory offers customers an attractive design highlighted by an optional pulsing blue back-light.

“For homeowners who struggle with getting out of the garage in time after pressing the wall button on their existing openers, the Wireless Wall Console provides a solution with a ‘Jogger Button,’ delaying the closing of the door. Homeowners can press it once for a 10-second delay, or press it up to three times for a maximum 30-second delay to exit the garage safely, without having to rush out of the garage,” said Christian Morrow, Brand Manager for the Overhead Door™ Brand. “This is just one of the many lengths our research and design team takes when developing new products to ensure we are producing solutions that fit and ease the daily lives of our customers.”

Since it is wire-free, the Wireless Wall Console allows for a speedy onsite installation and programs like a regular transmitter. The pulsing optional blue backlight makes the console easy to locate in the dark and can be turned off for maximum battery life at any time. To provide further convenience, the light will turn red to indicate low battery status.

The Wireless Wall Console is compatible with most Overhead Door® CodeDodger®

openers manufactured since 2013. The accessory is not compatible with Legacy[®] Models 1026 or 2026.
