**OVERHEAD DOOR INTRODUCES THE NEXT GENERATION IN COMPACT ROLLING DOOR SOLUTIONS  
WITH THE ALLURA™ SHUTTER**  
*New Security Shutters Offer Upscale Features, Stylish Aesthetics and Compact Design*

**LEWISVILLE, TEXAS** (October 9, 2015) – Overhead Door, the originator of the upward-lifting sectional garage door, is introducing the Allura™ Shutter, a versatile and attractive option for rolling security shutters. The Model 653 shutter is perfect for commercial applications looking for security in high-traffic pedestrian areas.

“Heavily visited areas such as retail stores, pharmacies and hospitals often need the security that a rolling shutter door offers as well as the flexibility in aesthetic options to match the surrounding environment,” said Jennifer Malcuit, rolling steel product manager for Overhead Door. “The Allura™ Shutter delivers on all fronts. With a variety of standard features and options for unique applications, Model 653 is the right choice when security and stylish design are at a premium.”

The Allura™ Shutter is a new compact rolling door solution versatile enough for specialty use, and it offers a space-saving design, making it perfect for installations with limited side room and headroom. The shutter offers an aesthetically pleasing look for any commercial application with its 197 baked-on powder coat colors and six wood grain powder coat finishes. The Allura™ Shutter also allows for many configurations including fenestrated and perforated slats for light and air infiltration.

The aluminum design of the system provides durability for both interior and exterior use and offers quiet and smooth function no matter if your shutters are operated manually, with a crank or motorized.
