Insulated steel construction, fashioned to resemble the elegant wood designs of traditional carriage house doors.
Courtyard Collection® doors give you the beauty of wood with the durability of steel. Each model provides varied design options to complement any home.
Our Courtyard Collection® doors are made with an insulated steel construction and fashioned to resemble the elegant wood designs of traditional carriage house doors.

**Foamed-in-place polyurethane insulation** with an R-value* of 12.76 and U-factor up to 0.24 helps control costly heat loss and gain. This type of insulation can diminish street noise and provides for quieter door operation.

**In-between section thermal seals** With an air infiltration rating as low as .08 cfm, these seals help to provide superior resistance to the elements.

**Weather resistant** – Wood grain textured trim boards are resistant to dents and the elements.

**Quiet operation** – Commercial grade track and hardware featuring durable 13 ball bearing rollers is standard for Model 7560 and is an optional upgrade for Model 7520. Residential track and 11 ball bearing rollers is standard for Model 7520.

**Wind load-rated door** (Optional on Model 7560). Safeguard your home in extreme wind conditions. Wind load rating means your home can be built to withstand a variety of wind conditions and meet your local building codes.

**High cycle spring option** – Choose a 25,000 cycle spring for almost twice the life of a torsion spring.

*Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

Model 7560, Panel C5 (163T) White finish, Stockbridge windows, decorative hardware
Choose a panel style and model

The Courtyard Collection® includes two models – please see the chart at the bottom of the page for details. Some panel styles are only offered in the Model 7560 as indicated below.
