Insulated steel construction, fashioned to resemble the elegant wood designs of traditional carriage house doors.
Courtyard Collection® doors give you the beauty of wood with the durability of steel. Each model provides varied design options to complement any home.
Our Courtyard Collection® doors are made with an insulated steel construction and fashioned to resemble the elegant wood designs of traditional carriage house doors.

**Foamed-in-place Polyurethane**
With a U-factor¹ of up to 0.15 and an R-Value² of up to 12.76, foam insulation helps control costly heat loss and gain. This type of insulation can also diminish street noise and provide for quieter door operation.

**Thermal Seals**
Innovative in-between section thermal seals provide an air infiltration rating as low as .08 cfm and help to provide superior resistance to the elements.

**Wood Grain Textured Overlay Boards**
Weather resistant trim overlay boards help protect against dents and the elements.

**Nylon 13 Ball Bearing Rollers**
Durable nylon rollers containing 13 heavy-duty ball bearings for quiet operation are standard on Model 7560 and an optional upgrade for Model 7520.

**Wind Load-Rated Options**
Choosing wind load-rated options helps safeguard your door in extreme wind conditions. Wind load rating means your home can be built to withstand a variety of wind conditions and meet your local building codes. (Optional on Model 7560)

**High Cycle Spring**
This optional spring provides a 25,000 cycle life for more than twice the life of a standard torsion spring.

---

1 - U-factor is independently tested and verified per ANSI/DASMA 105 using solid doors and specific product sizes.
2 - Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

Overhead Door™ Brand participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.
The Courtyard Collection® includes two models—please see the chart at the bottom of the page for details. Some panel styles are only offered in the Model 7560 as indicated below.
