

EDGE OF DOCK LEVELER

PROVIDES SMOOTH, SAFE PATH FOR LOADING DOCKS AND TRAILERS

Smooth Building-To-Truck Transition

- Designed to minimize bumps, gaps and damage to cargo and material handling equipment
- Reduces shocks and jolts to workers
- Facilitates fast movement of material handling equipment and forklifts

Easy and Safe Deployment

- Handle is easy to push/pull for comfortable and fast operation
- Handle range of motion keeps workers in a comfortable position
- Reduces bumps and trip hazards on deck and lip

Durable Design and Finish

- Rugged construction of lip and deck hinge provides durability for years of service
- Lip hinge sheds debris minimizing trapping and grinding between the lip deck junction causing fatigue
- Textured powder coat finish provides better traction for safety and helps to increase productivity. This durable finish also provides better corrosion protection and adhesion compared to wet paint
- Compliant with ANSI MH30.1-2022 which includes rigorous load testing requirements

Environmentally Friendly

Compared to paint, our powder coat process has major environmental advantages

1-Year Limited Warranty; 2-Year Limited Warranty when Overhead Door™ brand door and Edge of Dock Leveler purchased together.

INDUSTRY LEADING
COMMERCIAL & INDUSTRIAL SOLUTIONS

Quick Unloading on a Smooth Path

- Smooth path allows forklifts to move quickly over the leveler by minimizing bumps and jolts
- Optimized lip bevel provides a smooth roll over path from the trailer to the leveler

Easy-to-Use and Ergonomic

- Handle is quick and easy for workers to push/pull with a convenient built-in storage receptacle and is tethered so it never gets lost

Ultimate Safety

- Minimal bumps or gaps on deck/lip for workers to trip over
- Proprietary powder coat formulation is textured to provide enhanced traction and non-slip protection. This is also helpful in wet or rainy conditions where non-textured surfaces can become slippery and dangerous
- Handle range of motion keeps workers in a comfortable position to help prevent injuries
- The edge of dock automatically returns to stored position to prevent hazardous conditions

Durability, Low Maintenance, Low Downtime

- Heavy duty multi-lug construction sheds debris instead of trapping/grinding it between the lip/deck junction and causing fatigue and maintenance issues
- Factory-applied powder coat material for increased durability and corrosion resistance compared to paint

Environmentally Friendly

- Our powder coat process has minimal Volatile Organic Compounds (VOCs) and solvents
- Overspray is recycled which reduces waste disposal issues compared to a paint process
- The US Environmental Protection Agency (EPA) recommends powder coatings as a sustainable coating option

Serviceability and Installation

- Field serviceable with easy to reach adjusters for springs and kicker bar
- Serviceable lip and hinge pin can be removed without breaking welds
- Service brace is easy to reach under the leveler and tethered so it never gets lost
- Grease fittings to lubricate deck hinge for smooth operation

MODEL	SIZE	WEIGHT CAPACITY
E66R	66"	20,000 lbs. 30,000 lbs.
E72R	72"	20,000 lbs. 30,000 lbs.
BUMPER	STANDARD	OPTIONAL
Molded bumpers	✓	
Bumper boxes	✓	
LIP		
15" lip	✓	
17" lip		✓
Lip bevel	✓	
OPERATION		
Auto return to store	✓	
Self storing handle	✓	
Service brace	✓	
Safety tread on deck and lip	✓	
Working range 3" above/below dock	✓	

Proprietary textured powder coat finish designed to increase traction and reduce safety concerns

Open lug hinge sheds debris and allows for easy lubrication
