## **FOR IMMEDIATE RELEASE**

### **OVERHEAD DOOR ADDS TWO NEW PANEL DESIGNS TO THE POPULAR CARRIAGE HOUSE COLLECTION**

**LEWISVILLE, TEXAS** (June 25, 2015) – Last month, Overhead Door, the inventor of the upward-lifting garage door, announced the addition of two new panel designs, models 305 and 306, to its popular Carriage House Collection.

Model 306 is a modified carriage house design that features wide middle panels and narrow panels toward the sides. The varying spaced overlays give the door a more progressive look. Model 305 features a flush panel with rails and stiles outlining each door section. This design combines old-world charm with a clean flush door to create a unique style that will complement a variety of homes.

“Overhead Door distributors will love being able to offer two new panel designs to their customers, and homeowners will love having more unique choices for their garage doors,” said Mark Sawicki, residential product manager for Overhead Door.

Overhead Door's Carriage House Collection garage doors combine distinctive carriage house designs and superior insulated steel construction to create a harmonious blend of elegance and strength. Homeowners are able to customize the look of their garage doors by selecting from several paint or stain options, window styles and decorative hardware. The two new panel designs are currently available.

#### **About Overhead Door Corporation**

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of doors and openers for residential, commercial, industrial and transportation applications. The company has five divisions: Access Systems Division (ASD), which features the Overhead Door and Wayne Dalton brands; The Genie Company, manufacturer of remote-controlled garage door opening systems; Horton Automatics, a manufacturer of automatic entrance systems; TODCO, the largest producer of truck doors for the transportation industry; and Creative Door Services, Western Canada's leader in providing door products and services to the residential, commercial and industrial markets. Overhead Door Corporation created the original overhead garage door in 1921 and the first electric garage door opener in 1926. Overhead Door now employs more than 3,500 people, has 22 manufacturing facilities, 78 regional sales and service and installation centers and more than 5,000 distributors and dealers that service national builders, national accounts, architects, general contractors and homeowners, as well as major retailers in the U.S. and Canada. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan.
