

## **CONTROL AND MONITOR** YOUR GARAGE DOOR FROM ANYWHERE WITH YOUR SMART DEVICE

- Check if your garage door is open, closed or if there is any change to the door position
- Instantly know that someone is operating your garage door
- Open the door for anyone such as delivery, repair person or friends without providing the access password
- Have a history for each opener of when the door was used, including dates and times

Door Position Sensor

Door Control Module

**The OHD Anywhere™ uses a sensor attached to the garage door. That is an important security advantage versus other systems that monitor the opener instead of the garage door position.**

You are alerted as to whether the door changes to the fully open or closed position even if the door is operated manually by disengaging the door from the opener.

**OHD Anywhere™ delivers convenience, control and peace-of-mind, all in the palm of your hand.**

### Standard features

- Remote access control system with easy installation and set-up
- Compatible with most iOS and Android mobile devices
- Compatible with most residential garage door openers
- UL 325 compliant – audible and visual signals before door moves when operated from smart device
- One Door Control Module controls up to three doors.  
One Door Position Sensor is needed per door.  
(One module and sensor come standard with kit. Additional sensors sold separately.)

Download the free application which includes step-by-step programming and instructions.
