Featuring beautiful carriage house designs and durable construction to enhance your home’s curb appeal and protect it from nature’s fury.

- Stringently tested to meet wind load requirements
- Available with impact rated options
- Reinforced hardware throughout the door
- Designed to meet local building codes – when ordered with proper wind load options – including Miami-Dade County
- Foamed-in-place polyurethane insulation – with an R-value of 12.12* can improve the thermal efficiency of your garage space, reduce street noise and make the door operate more quietly.

- Durable overlays are specially treated to resist termites, weather and fungal decay.
- Joint seals – snug-fitting tongue-and-groove section joints reduces wind and weather from entering the garage.

*Overhead Door Corporation uses a calculated door section R-value for our insulated doors. The higher the R-value, the greater the insulating properties.
Courtyard Collection® Series 7565

1 Above wind speeds based on ASCE 7-05 are applicable for enclosed structures with an importance factor of 1.0, mean roof height of 30’, and assume a maximum of 2’ of the door is located within the end zone of a structure. The above wind speeds listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can affect the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

2 Above wind speeds based on ASCE 7-10 Category II structure with a mean roof height of 30’ and a maximum of 2’ of the door is located within the end zone of a structure. The above wind speeds listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can affect the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

3 Options available on select models.

- Wind load drawings available upon request.
- Wind speeds listed in this guide are provided for reference purposes only.

In ALL cases the local building authority is the sole and final determiner of the structural and safety requirements, and suitability of the garage door.

1 Above wind speeds based on ASCE 7-05 are applicable for enclosed structures with an importance factor of 1.0, mean roof height of 30’, and assume a maximum of 2’ of the door is located within the end zone of a structure. The above wind speeds listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can have a great effect on the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

2 Choose a texture and color:

Overlay texture options

Wood grain - standard

Smooth - optional

Color options

White/White
Almond/White
Taupe/White
Brown/White
Black/White

Door overlays and window trim are available in the colors shown or can be painted to match your home’s decor (additional charges may apply). Actual colors may vary from brochure due to fluctuations in printing process. Always request a color sample from your Overhead Door Distributor for accurate color matching.

3 Choose a window style:

Contact your Overhead Door Distributor to determine window availability and your local building official for code requirements.

Non-impact windows

4 Choose your hardware:

Two Spear pull handles and one bottom lift handle are included for single car doors. Double car doors come with two sets of decorative hardware (four Spear pull handles and two bottom lift handles). See website for additional hardware options.
Limited Warranty
Courtyard Collection® garage doors are backed by up to a limited lifetime non-transferable warranty.*
* Warranties vary by model, and are available upon request. See full text of warranty for details.

The Genuine. The Original.
Since 1921, Overhead Door has not only raised the standards of excellence for the industry – we’ve created them. Overhead Door created the first upward-acting door in 1921 and the first electric garage door opener in 1926.

Today, our network of over 400 Overhead Door Distributors are still leading the way with innovative solutions and unmatched installation, service and support. So look for the Red Ribbon. It’s your guarantee that you’re getting the genuine, the original Overhead Door.

Transform Your Home with the DoorView® visualization tool
Go to overheaddoor.com to try our on-line interactive software tool that lets you visualize what your home would look like with a garage door from Overhead Door. Contact your local Overhead Door Distributor for more information and to receive a quote.
