Reliable protection against high winds and wind-borne debris*
As the largest point of entry into your home, your garage door can be a point of failure during a high wind event and create the potential for debris and high-pressure damage within your home. A wind load-rated Overhead Door® garage door helps protect your home and its contents from the damaging effects of high winds during a severe weather event. Designed with specific components, such as track, jamb brackets, hinges, rollers and reinforcing struts, a wind load-rated door can withstand specified wind pressures and help protect against garage door failure during a high wind event. As a building component, garage doors may be required by local building codes to withstand certain positive and negative design pressures. The building department having authority in your area is the sole and final determiner of the wind load requirements for your garage door. Always contact the local building official for local code requirements. In addition, local building codes may require a permit for installation of replacement garage doors. Your homeowners insurance policy may also require your garage door to meet local code requirements.

Strength and stability
- Stringently tested to meet wind load requirements*
- Optional impact rating on select door models
- Reinforcing hardware throughout door system
- Additional horizontal bracing for further reinforcement
- Optional impact rated glass for additional safety and protection
- Insulated door system designs provide thermal efficiencies
- Various door system design options to meet door size needs, wind zone requirements, and exposure categories

Designed to protect your family and property
- Wind load options are designed to meet local building code requirements throughout the designated high wind areas of the country
- Wind load options may qualify the homeowner for insurance discounts
- We have a complete line of stylish and secure wind load-rated door systems, from wood to premium insulated doors, including some with impact-rated glass windows, to provide the protection you demand to help keep your family and property safe

* Refer to wind load design standards chart on page 5 for door model and applicable code requirements. Wind load and impact resistance requirements vary by region. Please contact your local Overhead Door™ Distributor for more information.

Cover image: Thermacore® Collection, Model 5740 (198), Long panel, White finish, Stockbridge windows, decorative hardware
Wind load-rated system for garage doors

**Wind-structure interaction**

1. High winds first create pressure against the windward side of the structure

2. During high wind events, debris can become powerful projectiles that can damage the garage door, reducing the door's ability to protect the home against damaging winds

3. Pressure increases when the wind moves around the corner and down the side of the building

4. Garage doors with no reinforcement can buckle under the pressure, giving the high winds access to the interior of the structure

5. This often results in the roof members and wall panels being damaged, allowing rain, wind and debris to have easy access to the inside of your home
Our Windstorm™ wind load-rated garage doors are tested and designed to provide additional reinforcement during pressure conditions caused by strong winds during extreme weather. As the homeowner, it’s important to check with your local building code official to determine your home’s specific wind load requirements so you can choose the best door to meet your needs.

Refer to table below to find the door series and choose your recommended wind load options to meet applicable approval agencies requirements.

Choosing a Door
What to consider when selecting a door

Note: Previous model numbers and panel styles are shown in parenthesis in gray on each model page.

Style
Whether your home is classic or contemporary, we offer styles and options to complement your home’s architecture. For a distinctive, custom look, choose insulated doors from our elegant Courtyard Collection®, Thermacore® Collection or Impression Collection® or the custom fine wood doors of the Signature® Carriage Collection.

Appearance
To further individualize your door and enhance the look of your home, we offer numerous options, including a variety of panel styles, windows, glass, decorative hardware and colors.

Comfort
If you live in an area with extreme hot or cold temperatures, we recommend a well-insulated, thermally-efficient door to ensure your comfort. Some of our insulated doors, including the Courtyard Collection® and Thermacore® Collection, also feature a steel backing that provides a finished, clean look to your garage’s interior.
Our Traditional Steel Collection garage doors offer many options to choose from, each uniquely designed to provide lasting performance and durability to meet your wind load needs at our best value.

### Embossed wood grain texture
Adds beauty, sophistication and durability.

### Reinforced door construction
For maximum strength, durability and minimal weight.

### Durable finish
Hot-dipped galvanized steel with two coats of baked-on polyester paint.

### Bulb-type bottom weatherseal
Guards against wind and rain while providing a cushion when closing.

### Surface
Embossed wood grain adds beauty, sophistication and durability.

All doors are available in the colors shown or can be painted to match your home’s décor. Actual door colors may vary from brochure photos due to fluctuations in the printing process. Always request a color sample from your Overhead Door™ Distributor for accurate color matching.

Window style
For the full selection of windows for Traditional Steel Collection doors please see page 29.

Contact your Overhead Door™ Distributor to determine window availability and your local building official for code requirements.

Decorative hardware
For specific hardware details please see page 30.

Impact resistant windows are available.
(Miami-Dade Broward approved upgrade).
WindStorm™
Models 5745 & 5765

Made with two layers of steel and polyurethane foam insulation, Models 5745 and 5765 are extremely durable. These doors are offered in five designs with factory-finished colors or an optional bi-directional wood grain finish that emulates the beauty of real wood.

Construction
Provides a continuous layer of foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel, for maximum thermal efficiency.

Embossed wood grain texture
Adds beauty, sophistication and durability.

In-between section thermal seals
Snug-fitting tongue-and-groove section joints reduces wind and weather from entering the garage.

Heavy gauge steel end caps
Wrap-around end cap trim out door edges for better appearance, improved strength and protect the insulation from damage.

Bulb-type bottom weatherseal
Guards against wind and rain while providing a cushion when closing.

**Model 5745** (Impact glass available).
For Vertical Short Panels with windows a full row of windows are required. For Standard, Vertical Short, Long Panels with windows a full row of impact windows are required. Impact glazing available.

**Model 5765** (Impact glass not available).
For Vertical Short Panels with windows a full row of windows are required. Impact glazing not available.

Decorative hardware
For specific hardware details please see page 30.

For 5745 only:
Impact resistant windows are available. (Miami-Dade Broward approved upgrade).
**WindStorm™ Model 7565**

Made with two layers of steel and polyurethane foam insulation, Model 7565 is not only durable, but a unique way to add style and curb appeal to your home.

**Polyurethane insulation**
Foamed-in-place polyurethane insulation with an R-value of 12.12° can improve the thermal efficiency of your garage space, reduce street noise and make the door operate more quietly.

**Durable overlays**
These overlay boards are specially treated to resist termites, weather and fungal decay.

**Joint Seals**
Snug fitting tongue-and-groove section joints reduces wind and weather from entering the garage.

Thermacore® Collection

For premium construction and maximum thermal efficiency, Thermacore® Collection insulated steel doors are the ideal choice. Choose from several panel designs featuring our sandwiched insulation design, offering varying strengths of wind load protection for your home.

Thermacore® construction
Provides a continuous layer of foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel, for maximum thermal efficiency.

Embossed wood grain texture
Adds beauty, sophistication and durability.

In-between section thermal seals
With an air infiltration rating of up to 0.08 cfm, these seals help to provide superior resistance to the elements.

Durable finish
Hot-dipped galvanized steel with two coats of baked-on polyester paint.

Bulb-type bottom weatherseal
Guards against wind and rain while providing a cushion when closing.

**Powder coat finishes**
Select from approximately 200 RAL powder coat color options to best match your home.

Actual door colors may vary from brochure photos due to fluctuations in the printing process. *Always request a color sample from your Overhead Door™ Distributor for accurate color matching.*

Glass type
Double Strength (DSB) glass comes standard. In addition we offer an array of choices to complement your home. Insulated glass available.

**Specialty Glass**
- Laminated White – privacy
- Low E Glass* – thermal efficiency
- Tempered Glass – enhanced safety
- Tinted Glass* – color options: Green, Grey, Bronze

* Insulated options available

**Glass alternatives**
- Clear polycarbonate* – shatter resistant
- Multi-wall polycarbonate – superior strength with UV protection; color options: Clear, White, Bronze
- Acrylic* – shatter resistant
- Impact Clear and Frosted Polycarbonate - 0.250” minimum

Note: Stile placement may vary due to wind load or other options.
The look of wood carriage style swing doors with varied design options, thermal performance and the durability of steel to protect against the elements of extreme weather conditions.

**Polyurethane insulation**
Provides thermal efficiency with an R-value* of 10.

**Bulb seal**
Protects against the elements.

**Embossed wood grain texture**
 Adds beauty, sophistication and durability.

**Durable finish**
Hot-dipped galvanized steel with two coats of baked-on polyester paint.

*Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

Foamed-in-place polyurethane insulation
R-value* of 7.6 helps control costly heat loss and gain. This type of insulation can diminish street noise and provides for quieter door operation.

Designed with award-winning safety and technology
Features including pinch-resistant door panels.

Bulb-type bottom weatherseal
It guards against wind and rain while providing a cushion when closing.

Fiberglass exterior
The beauty of wood without the maintenance.

Factory installed powder coated hardware
Ensures proper alignment and smoother operation with a clean interior appearance.

*Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

Hardware
For style and strength

Decorative hardware
Further individualize your garage door with our distinctive decorative exterior handles and hinges. Available as optional accessories on our door collections. Not all hardware will fit all door sizes. Consult your local distributor for more information.

Premium Collection
Spade Design Hinge
Heritage Hinge
Bean Design Hinge
Traditional Hammertone Hinge

Value Collection
Spear Hinge (16” and 18” available)
Bean Hinge (16” only)

Wind load hardware
Overhead Door™ WindStorm™ doors feature upgraded hardware to make your door stronger against wind storms. Depending on the wind load option selected, the upgraded hardware includes:

1. Horizontal reinforcement steel struts
2. Upgraded springs
3. Heavy-duty track
4. Heavy-duty rollers
1 Wind speeds based on ASCE 7-05 are applicable for enclosed structures with an importance factor of 1.0, mean roof height of 30’, and assume a maximum of 2’ of the door is located within the end zone of a structure. The above wind speeds listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can have a great effect on the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

2 Wind speeds based on ASCE 7-10 Category II structure with a mean roof height of 30’ and a maximum of 2’ of the door is located within the end zone of a structure. The above wind speeds listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can have a great effect on the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

3 Options available on select models.

- Wind load drawings available upon request.
  Wind speeds listed in this guide are provided for reference purposes only.
  In ALL cases the local building authority is the sole and final determiner of the structural and safety requirements, and suitability of the garage door.

SP - Short panel windows, LP - Long panel windows

* Polystyrene insulation: Refers to insulation for improved energy efficiency and sound reduction.
** R-value: The higher the R-value, the greater the insulating properties.
§ Heavy-duty steel: A thicker, more durable and dent-resistant option, designed to withstand additional knocks and bumps from outdoor activity.
† Backing: Vinyl – For a clean, more finished look and added sound absorption.
  Steel – Interior-side steel backing for strength and finished appearance.
Transform Your Home with the DoorView® Visualization Tool.
Go to overheaddoor.com to try our online interactive software tool that lets you visualize what your home would look like with a new Overhead Door™ garage door. Contact your local Overhead Door™ Distributor for more information and to receive a quote.

The Genuine. The Original.
Since 1921, Overhead Door Corporation has not only raised the standards of excellence for the industry – we’ve created them. We created the first sectional garage door in 1921 and the first electric garage door opener in 1926.

Today, our network of over 400 Overhead Door™ Distributors are still leading the way with innovative solutions and unmatched installation, service and support. So look for the Red Ribbon. It’s your guarantee that you’re getting the genuine, the original Overhead Door™ products and services.
