**OPERATING INSTRUCTIONS**

**FOR CONVENIENCE**

**Program Keypad Before mounting.**

**IF PROGRAMMING SHOULD FAIL AT ANY POINT, SEE CLEARING WIRELESS KEYPAD TO START OVER.**

**STEP 1:** **SETTING YOUR WIRELESS KEYPAD PIN (PERSONAL IDENTIFICATION NUMBER)

A

1. Activate programming mode.
   - Press (in order) .
   - Red LED blinks - once per second.
   - Enter your PIN (3 to 8 characters).
   - Press .
   - Red LED blinks - twice per second and turns off.

**STEP 2:** **PROGRAMMING ONE DOOR OPENER**

A

1. Find the Learn Code Button and Learn Code Indicator LED on your door opener.
   - If your Door Opener has a black Antenna Wire, the Learn Code Button and Indicator LED are located near the Antenna. (The Light Lens may need to be opened.)
   - If your Door Opener does not have an Antenna, you have an External Receiver. The External Receiver cover must be removed to access the Learn Code Button and Indicator LED.
   - Press the Learn Code Button.
   - Learn Code Indicator LED (on Opener) blinks. (The Light Lens may need to be opened.)
   - Enter your PIN and press on Keypad.
   - Learn Code Indicator LED stays on.
   - Press again.
   - Learn Code Indicator LED turns off.

   - Door should move.

   - Wait until Keypad Backlight turns off (approximately 30 seconds).

**STEP 3:** **OPERATING ONE DOOR OPENER**

A

1. To move the Garage Door.
   - Enter your PIN.
   - Press .

**NOTE**

- If the Door does not move, check the red LED on Keypad. If the LED is blinking rapidly the PIN was entered incorrectly. After the LED stops blinking, re-enter your PIN and try again.
- Any Keypad Button will control the Door for 30 seconds after the Door starts moving.
- Rapid blinking of the red LED indicates an error. After a few seconds the LED will turn off. Start over.

Proceed to Section 3 - Mounting Instructions.

**FEATURES:**

- Ability to control up to three Overhead Door CodeDodger® Openers
- Simple to Program and Install
- PIN Codes can be up to 8 Characters
- Low Battery Power Indicator
- Stays Programmed During Battery Change
- Temporary PIN for Special Purpose Access

**TOOLS NEEDED:**

- Drill with 1/8” Drill Bit
- Phillips Screwdriver
- Screwdriver
- Mounting Screws Included inside Battery Compartment

**SECTION 3**

**MOUNTING INSTRUCTIONS**

The Keypad must be mounted in sight of the Door(s), at least 5 feet above the ground and clear of any moving Door parts.

**A** Mount Keypad, (Mounting screws located inside Battery Compartment).
- Remove Battery Cover (See Section 4 Figure 2).
- Drill a 1/8” hole for the top mounting screw.
- Install a screw into the drilled hole, leaving a 1/8” gap between the screw head and the wall. See Figure 1.
- Hook the Keypad over the screw.
- Mark, drill pilot hole and fasten bottom screw.
- Reinstall Battery Cover.

**B** Program Door Opener(s).
- Return to “Programming” (Section 1 or Section 2).

**SECTION 4**

**ADDITIONAL OPERATIONS**

**CLEARING WIRELESS KEYPAD TO START OVER OR**

**CHANGING YOUR PIN**

A

1. Press and hold . Keep holding while you—
   - Press .
   - Press again. Red LED blinks - twice per second and turns off.

2. Press Red LED blinks - twice per second and turns off.

**STEP 3:** **PROGRAMMING DOOR OPENERS**

A

1. Decide which Door will be Door #1, #2 and #3.
   - Press the Learn Code Button (See Section 1 Step 2).
   - Learn Code Indicator LED (on Opener) blinks.
   - Enter your PIN and press on Keypad.
   - Learn Code Indicator LED continues to blink.
   - Press the number you have picked for this Door Opener.
   - Learn Code Indicator LED stays on.
   - Press again.
   - Learn Code Indicator LED turns off.
   - Door should move.

You MUST wait until Keypad Backlight turns off (approximately 30 seconds). Not waiting will create a system malfunction that causes 2 doors to operate at the same time.

B Repeat Step A above for each Door Opener. Each Door Opener must be programmed to receive the signal from the Wireless Keypad.

**STEP 4:** **OPERATING 2 OR 3 DOOR OPENERS**

A

1. To move one of the Doors.
   - Enter your PIN.
   - Press .
   - Press Door Operator number 1 or 2 or 3.

**NOTE**

- DO NOT reprogram the Door Openers.
- Temporary PIN remains active until the next time your normal PIN is entered.

**CLEARING BATTERY**

If the red LED does not blink during use, the battery needs to be changed.

**FCC and IC CERTIFIED**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**SECURE PIN PROTECTION**

The Keypad is designed to provide a high level of security. A temporary PIN allows temporary access to your home by repair persons, meter readers, etc. if you so desire.
